

## RASP CUTTER CYLINDER 7.5 MM

New for woodworking and particularly designed for wood-carvers. Rasp cutters with tungsten-carbide metal tips. Superb for modeling, stripping and smoothing wood and fibreglass! Ideal for precision elaboration and refinement of creases, grooves and recesses. Extremely sharp and easy to guide: The material is removed in a controlled manner without exerting force, regardless of whether you work with or against the wood grain. High durability and easy to clean with Bunsen burner. Also suitable for rubber, foam material and silicone. Speed 5,000 - 20,000rpm. For 3.2mm shanks. Not suitable for metal!
