

SCROLL SAW DS 230/E PROXXON

The ideal machine for that delicate project: model building, toy making and precision work.

Cuts soft wood (e.g. balsa) up to 40mm, hard wood up to approx. 10mm, plastic (including PC cards) up to approx. 4mm and non-ferrous metals up to 2mm. Very stable ribbed die-cast aluminium saw frame with 300mm throat. Blade guide with integrated blower. Height adjustable head (3 positions). Blade usage is improved as the head may be lowered in two steps, making new blade teeth available. This effectively triples blade life. The lowest head position still allows blades, shortened by 60mm, to be used.

Machined worktable of die-cast aluminium, 160 x 160mm. ABS plastic body with side sliding panel for removal of saw dust. VDE approved 220 - 240V motor (85W) for prolonged, low noise performance. Quiet, wear-resistant toothed belt drive running in a ball bearing. Electronically controllable stroke rate from approx. 150 - 2,500/min. Adjustable fence and mitre stop with scale.
