

PROXXON TG 125/E - DISK SANDER

For all wood types, steel, non-ferrous metals, precious metals, plastics (also plexiglass and glass fibre). Electronically regulated sanding speeds 250 - 800 m/min.

Powerful drive and vibration-free running thanks to balanced DC motor. Housing in glass-fibre reinforced POLYAMIDE. Aluminium table, adjustable to 50° incline downwards, 10° upwards. With angle stop. The squared sanding disc has a glued-on silicon film. This surface ensures that self-adhesive sanding discs can be removed without problems after use. Two additional quadratic silicon films ensure that used discs can be stored and reused.

Suction channel with union for connecting extraction device for dust-free working. Each with 2 sanding discs of 80 grit, 150 grit and 240 grit.

Technical data:

220 - 240 V. 140 W. 50/60 Hz. Adjustable grinding speeds between approx. 250 - 800 m/min (corresponds to 1,150 - 3,600 rpm).

Sanding disc 125 mm. Table 98 x 140 mm. Sanding height 62.5 mm.

Size 300 x 140 x 160 mm. Weight approx. 3 kg.
