

TABLE TOP SMOKE ABSORBER

Make Your Benchtopy a Smoke-Free Zone

This table top smoke Absorber removes the stronger fumes created by today's lead-free solder fluxes.

While the introduction of lead-free solder has created a healthier environment for everyone who works with solder, the more active fluxes required give off more fumes than ever before: this is the perfect solution for this smoky problem.

The table top smoke absorber removes flux fumes from the bench top by drawing the smoke through an activated carbon filter. Powered by an exceptionally quiet fan, it can process up to 1.37 cubic meters of air per minute. The collector can be easily

adjusted to multiple positions, optimizing its fume-absorbent performance. It's time to clear the air.

Technical Specifications:

Voltage 230 V

Sound Level 45-50 dB (A)

Power Consumption 20 W

Absorption Capacity 1.25 m³ /min. (50 Hz)

ESD safe? Yes

VDE / CE certificated? Yes

Spare Filters 3 pieces incl

SKU 22383
