

FUSING MOLD - PATTERN BAR MOULD 4 25,8 X 22,2 X 4,5 CM

Casting Mould for deeper pattern bars made from sheet glass, stringers, frit etc. To cut the pattern bar into murrine slices a diamond saw is required.

Beautiful artwork can be made by arranging the murrine slices to repetitive patterns or by using one murrine slice a focal component in a piece or for jewellery.

Tip: To stop the glass from running off the mould during the firing, block the ends of the mould with ceramic fibre paper or similar.
