

FUSING MOLD - DEEP OVAL 48,2 X 20,8 X 6,4 CM

This mould creates a great focal object for a side board, coffee table or desk and is a good shape for a serving dish at the dinner table.

By cutting the glass slightly smaller than the mould outline, you transform the finish piece into a vessel or boat shape.

Tip: Best results with minimal distortion are achieved by slumping at a the lowest possible temperature with a long soak.
