

FUSING MOLD - SALAD BOWL 37,5 X 11,5 CM

This is a very special mould to make a tiny but fairly deep bowl. The result can be a simple piece or artwork as well as a utilitarian object in the dining area. Why not try, cutting a square piece instead of glass instead of the standard round.

The steep angle of the mould may result in an uneven slumping. Reposition the slumped piece and fire a second time.
