

FUSING MOLD - RETRO PARTY BOWL 42 X 42 X 9,7 CM

Focal piece for a corporate environment, reception room or any larger space or it could be used as fruit bowl etc.

Try to fuse identical squares from two contrasting colours, total thickness 6 mm minimum. The steep angle of this mould will reveal the bottom colour on the side. The sides will tend to pull in and give a more natural feeling to this large and solid shape.
