

EVENHEAT LB 22.5 KNIFEMAKING AND HEAT TREATING KILN

Evenheat LB 22.5 - Electric Kiln for Swords and Heat Treatment

The LB 22.5 is a single-phase kiln equipped with a Schuko plug, with a power consumption of 3.6 kW and a maximum temperature of 1200°C. The internal length of 572 mm makes it ideal for crafting very long blades, such as swords, kitchen knives, and technical tools. This is the European version, operating at 230-240 V and CE certified.

Main Features:

- Side-heating element design for uniform heat distribution across the chamber.
- Side-opening door for enhanced safety during heat treatment.
- Cool-touch handle for easy and safe operation.
- Refractory brick chamber for uniform heat release during soak periods.
- CE certification and operation at 230-240 V, ideal for the European market.

Rampmaster 3 Controller: The Rampmaster 3 is built on Bartlett Instruments' V6-CF platform, primarily designed for glasswork but also excellent for heat treatment. This controller offers:

- Dedicated buttons and a clear, intuitive display.
- Paired with a special limits thermocouple for highly precise temperature measurement.
- Simple operation for those who prefer a traditional design over touchscreens.

Note: The accessory set (refractory shelves and spacers) is not included and must be ordered separately.
