

## TORMEK T4 SHARPENING SYSTEM

Tormek T-4 is a high quality and compact sharpening machine, suitable for home and hobby work as well as professional use. The extensive Tormek jig system will allow you to sharpen all the common edge tools with highest precision. **Key Features**

- **Water cooled sharpening:** The Tormek T-4 precision and stability is at a top level. Motor and the main shaft are mounted in the zinc cast top, which also includes integrated sleeves for the Universal Support. Having this advanced design ensures an unbeatable precision for the Universal Support, which control all jigs and accessories.
- **Grinding wheel for both coarse and fine sharpening:** Tormek T4 is equipped with the Tormek Original Grindstone that is optimized to combine efficient steel removal, smooth surface finish and a long life. Using the included Stone Grader, you can alter the stone surface from 220 grit to about a 1000 grit surface: this will give you two different sharpening qualities in one stone.
- **Sharpen chisels, knives, scissors, carving tools and more:** The T-4 is well suited for sharpening chisels, knives, scissors, and smaller tools like carving tools. It also works with turning tools and drill bits, but for plane irons and moulding knives we recommend one of the larger Tormek machine models. Note that a few shapes of gouges cannot be honed with the SVD-186 Gouge Jig on the leather honing wheel due to the compact size of the Tormek T-4. These tools can be honed freehand instead.
- Motor is rated for 30-minutes continuous use at a time. That is usually more than enough for the house need, but if you sharpen more we advise you to take a look at Tormek T-8 which can run continuously.

### What's included in the price

- The SP-650 Stone Grader to change the grit of your stone.
- The WM-200 AngleMaster to measure the edge angle.
- The PA-70 Honing Compound to use with the Leather Honing Wheel.
- The EM-15 Edge Marker to color the bevel when setting the edge angle.
- The HB-10 Tormek Handbook on sharpening.
