

WOOD DAPPING BLOCK & PUNCHES

Wood dapping blocks are used with dapping punches to shape and create a domed surface on metals. This block provides six different curved surfaces to shape a variety of disc sizes.

Wood will not scratch or mar the surface of precious metals, and provides a nice, even curvature to pendants and more intricate designs. Easy to use: all you need is a dapping punch and block, a rubber mallet, and a non-slip surface.

Includes wood dapping block and 2 wood dapping punches

Dapping Block Dimensions: 55 x 55 x 55 mm.

Wood block depressions range from about 25 mm to 45 mm.
