

NABERTHERM RAKU 100 KILN COMPLETE SET

The Nabertherm RAKU 100 oven is a professional gas heated kiln for ceramic for outdoor use with commercially available propane gas. It is equipped with a relative propane gas burner and an electronic temperature indicator.

Key Features

- Excellent insulation with low absorption for short cooling times
- Special flame duct for good uniformity of the temperature
- Positioning of the gas burner under the kiln with consequent centralized heat transfer to the charge
- The supply includes a propane gas burner and an initial set of accessories for firing
- Adjustable door with an opening angle of approx. 270°
- Eco-friendly and durable powder coated metal structure of the housing
- Usable firing space: 35 x 35 x 35 cm

What is included when purchasing this item:

- Raku 100 kiln
- Support table for Raku 100 oven
- Kiln furniture set with 3 shelves 35 x 35 cm and supports
- High power propane gas burner (15 kW) with cylinder connection
- Temperature meter for RAKU 100 kiln, easy to use, NiCr-Ni heat detector, display values from 20 ° C to 1200 ° C, possibility of connection for a second detector with display switching
