

BOTZ 9010 KILN WASH 800 ML

This separating agent is the ideal solution to protect the kiln shelves when firing glazed objects.

How to use:

- Apply with a brush 2-3 times and leave to dry.
- Fire for the first time in the kiln with other biscuit objects.
- If the protective layer is ruined, it can be filled using the same product and fired again.
- Any damaged layers can be removed with a spatula
