

## TORMEK DC-250 - DIAMOND WHEEL D.250 MM 360 GRIT

The Tormek Diamond Wheel Coarse has a grit size of 360 for fast steel removal when shaping and a rapid repair of a dull or damaged edge. Included with every diamond wheel is 150 ml of Anti-Corrosion Concentrate.

### Usage

Always use the concentrate in the water when sharpening with water to prevent rust on the grinding wheel. Add 10 ml of concentrate to 250 ml water (~ 4%). We recommend to always use water when sharpening with the diamond wheel, as it prolongs the life of the wheel and provides a finer surface. It is also possible to sharpen without water. You can sharpen all types of material, including steel, ceramic and carbide. Fits Tormek T-8, Tormek T-7 and previous models with a 250 mm stone diameter.
