

TORMEK BGM-100 - BENCH GRINDING MOUNTING SET

If you need to remove a lot of steel to create a desired shape on a new tool, this Bench Grinder Mounting Set BGM-100 enables you to use the Tormek woodturning jigs also on your bench grinder.

Take control of your profiles

No matter which grinding machine you use, the most difficult part in sharpening woodturning tools is to exactly replicate the shape and the edge angle. With the BGM-100 you can now use the following Tormek jigs on your bench grinder: the Gouge Jig SVD-186, the Multi Jig SVS-50, the Tool Rest SVD-110 and last but not least the Turning Tool Setter TTS-100.

This package includes:

- a height adjustable block
- hardware
- a Universal Support
- a Horizontal Base
- feet for the base you will build and comprehensive instructions.

Mount the set on either side of the grinder.
