

TEMPERATURE CONTROLLER BOX + ATR144 - 3000W

This temperature control box allows you to transform any oven without temperature regulation into a kiln equipped with an electronic temperature controller.

Key Features

- Simple to set up: insert the thermocouple into the firing chamber, connect the oven plug to the control box socket and the control box plug to the electrical outlet.
- You can connect kilns up to 3000 W of power
- This box is equipped with ATR144 temperature controller - single program, 2 segments + controlled descent.
- The computer can also be programmed using the special MyPixsys app (available on google play and the app store): a phone equipped with an NFC antenna is required
