

ZEROQUATTRO - MODULAR RAKU KILN 90 LT

Zeroquattro is the latest version of our **gas kiln for Raku** and is the result of years of experience in the production of systems for firing this type of ceramics.

With a capacity of 90 liters, its modularity and the great quality construction you will hardly find on the market alternative solutions valid in this price range.

Key Features:

- Structure completely in BA stainless steel
- Firing chamber made of 1230 ° C refractory bricks, with high density fiber-ceramic gaskets
- Steel handles on each module
- 85 mm hole in the top lid for the exhaust of combustion fumes
- Side entry hole for thermocouple insertion (sold separately)
- 110 x 70 mm lateral inlet hole for burner (sold separately).
- 1400 °C high temperature refractory shelf and 4 refractory supports
- Made in Italy :)

Technical specifications

- External dimensions: 65 x 60 x h. 80 cm (including pedestal)
- Internal dimensions; 44 x 44 x h. 46 cm
- Volume: 90 liters
- Refractory plate: 40 x 40 cm
- Height of supports for plate: 80 mm
- Weight: 53 kg
