

TORMEK KJ-45 - SELF CENTERING KNIFE JIG

Accessory for Tormek sharpening systems.

This Tormek patented self-centering knife device allows for symmetrical sharpening results with the same angle on both sides of the blade, regardless of thickness and geometry. Whether you sharpen a normal kitchen knife or a larger hunting knife with a more tapered end, you get the same result in both stages of sharpening the knife without having to reset the device. Suitable for almost all types of knives: household, chef, carving, hunting or fishing. Can also be used with wood-cutting tools and lopping shears.

Key Features

- Allows you to center the knife in the device ensuring the best symmetrical result.
- Allows you to center and stabilize knives with a more tapered end.
- Additional support for tall knives such as counter knives.
- Possibility to create a slightly convex cutting edge with a movement between the two supports.
- Robust construction - zinc die-cast clamps and durable composite supports.
- Excellent balance - the concentration of weight in the clamps ensures a more balanced feel of sharpening.
- Smooth movement with low friction against the universal support.
- Compatible with Tormek T-4, Tormek T-8 and previous models.
