

TORMEK KJ-140 - SELF CENTERING LONG KNIFE JIG

This Tormek sharpener attachment is perfectly balanced and provides superior stability when sharpening knives with long, flexible blades, such as filleting knives. It allows to obtain a symmetrical sharpening with the same angle on both sides of the blade. The blade is centered in the device regardless of thickness and geometry, ensuring the same result in both stages of knife sharpening. The long clamp stabilizes the flexible blades and prevents them from bending, ensuring constant angle and pressure throughout the sharpening operation.

Key Features

- Allows you to center the long and flexible blades in the device ensuring the best symmetrical result.
- 140 mm wide clamp stabilizes the flexible blades.
- Allows you to center and stabilize knives with a more tapered end.
- Additional support for tall knives such as counter knives.
- Possibility to create a slightly convex cutting edge with a movement between the two supports.
- Robust construction - zinc die-cast clamps and durable composite supports.
- Excellent balance - the concentration of weight in the clamps ensures a more balanced feel of sharpening.
- Smooth movement with low friction against the universal support.
- Compatible with Tormek T-4, Tormek T-8 and previous models.
