

WATER FED DRILL HEAD ASSEMBLY 1/2 GAS THREAD

Equipped with CM 2 (or MT2) connection, it fits on a normal pillar drill transforming it into a practical water drill. To be used with hollow diamond core bits with Belgian type connection (1/2 gas)

Key features

- Transforms a normal drill press into a professional water drill, ideal for drilling glass or stone
- To be used with hollow diamond core bits, to allow constant lubrication on the tip
- Equipped with water connection, with tap and connection for 10 mm hose
- Equipped with pressure-sealed ball bearings
- Solid steel construction
- It mounts core bits with standard 1/2 GAS connection (Belgian connection)
- CM2 attack
- Dimensions: 50 x 100 mm, length 100 mm (without CM2 attachment)
