

## BENCH BELT SANDER PROXXON TB 50

Sands long edges, end sections, radii, mitres, and, by turning the workpiece overaccurate flat surfaces at right angles. Dust-free, clean working due to highly effective extraction. Sanding speed of 400 m/min.

- Used on soft and hard woods, non-ferrous metals, steel, plastics (perspex and PC cards) and cork.
- Powerful drive thanks to balanced DC-motor.
- Easy replacement of bands without need for tools as rollers are under spring tension.
- Fine adjustment of rollers prevents the belt from lateral roll-off.
- The compact and light design allows stowing away easily after work is done.
- Suction channel with adapter to connect a vacuum cleaner.

### Technical data:

- 230V. 50/60Hz.
- Sanding speed 400m/min.
- Belt dimensions 50 x 533mm.
- Size 250 x 200mm.
- Height 250mm.
- Weight approx. 5kg.
