

BICOMPONENT GLUE FOR PLASTIC LOXEAL SUPERLOX 25 ML

This Two-Component Structural Adhesive is a translucent product ideal for bonding difficult-to-join plastics. Thanks to its formulation, it ensures quick fixing in just 12 minutes with a 1:1 volume mixing ratio. In addition, it is able to guarantee **good resistance to water, fuels and oils**, providing structurally strong joints, particularly resistant to tension and various chemical agents.

This adhesive is ideal for:

- PTFE - Teflon
- PE - Polyethylene
- PP - Polypropylene
- PMMA
- PETG
- Stainless Steel/PP
- Stainless Steel/PE

Key features:

- High mechanical strength
- Good resistance to chemical agents and moisture
- Possibility of use with convenient manual or pneumatic guns for precise mixing and dosing
- Tough adhesion

This product is supplied in a 25ml dual-cartridge with a mixer included in the price.
