

SLIP CAST MOLD - BOWL D.300MM

Special plaster mold, perfect for creating hollow objects by pouring Slipfast or slip or pressing clay directly into the mold.

- Allows the creation of a bowl with a diameter of 280 mm x height 80 mm.
- Dilute Slipfast or slip with water to achieve the desired viscosity.
- Pour the product into the mold until full, topping up as water is absorbed.
- Let it set for 10-30 minutes depending on the final thickness required.
- Drain the remaining liquid, which can be filtered and reused.
- Allow to drain well and carefully remove the pieces, which will be workable to remove joint marks or imperfections.
- Let dry for 12-24 hours and proceed to firing for slip or decoration for Slipfast.
