

## TITEBOND INSTANT BOND MEDIUM JET BLACK

Titebond Instant Bond Medium Jet Black is a medium-viscosity cyanoacrylate (CA) adhesive that dries to a glossy black finish. Perfect for accenting details, inlays, working with spalted wood, and filling knots or cracks, it combines strength with versatility. Bonds are stronger than wood and resistant to heat, impact and solvents. Also suitable for rubber, plastics, ceramics, metals, stone and other porous materials. **Key features**

- Glossy black finish after curing
- Medium viscosity, versatile application
- Ideal for inlays, spalted wood and knot filling
- High strength and impact resistance
- Heat- and solvent-resistant bond

### Technical specifications

- Open time: 30 s
- Hold for: 20 s (with CA accelerator)
- Set time: 60 s (with CA accelerator)
- Full cure: 24 h
- Colour: jet black (liquid), glossy black (solid)
- Viscosity: 500 cPs
- Gap fill: up to 0.2 mm
- Operating temperature: 13–29 °C
- Shelf life: 24 months at 16–27 °C
- Volume: 59 ml

### Instructions of usage

- Apply on clean, dry surfaces
- Assemble within 30 s, hold for 20 s and let set 60 s using CA accelerator
- Full cure in 24 h
- Clean with acetone
