

Professional 8-litre pressure sprayer designed to supply a constant water flow to diamond band saws, pillar drills and other glass, ceramic, stone and marble machines. The durable PP tank with pressure gauge and safety valve ensures stable pressure, while the hose with tap allows precise adjustment of coolant flow to the tools during cutting and drilling.

#### Key features

- Portable pressure sprayer for water cooling of tools
- Ideal for glass, ceramics, stone and marble studios
- Flexible hose with control tap for adjustable flow
- Integrated pressure gauge and over-pressure safety valve
- Shoulder strap for easy transport between workstations

#### Technical specifications

- Tank capacity: 8 L
- Materials: high-strength PP, stainless steel and plastic components
- Height: 56 cm; diameter: 18 cm
- Empty weight: 1.69 kg
- Colour: white/blue with black details
- Supplied with: pressure sprayer, hose with tap, pressure gauge, shoulder strap

#### Usage instructions

- Fill the tank with clean water up to the marked level.
- Close the lid and pump until the required pressure is reached.
- Connect the hose to the machine and slowly open the tap to set the flow.
- Check water level and restore pressure regularly during operation.
