Techniglass The Runner Glass Score Running Tool is a next-generation professional running plier designed to accurately open straight scores, inside arcs, circles, curves, and angled cuts in glass. Made from aluminum alloy, it combines structural rigidity, control, and comfort, allowing precise score running on glass up to 1/4" (6 mm) thick with reduced effort and improved handling. **Key features**

- ART technology with adjustable radius for different score paths
- Suitable for straight lines, inside arcs, circles, curves, and angles
- Rigid aluminum alloy construction resists flex during use
- Self-aligning directional knob for precise centering on the score line
- Ergonomic, ambidextrous, anti-fatigue design
- Ideal for narrow strips, deep inside curves, and split-ring donut shapes

Technical specifications

- Type: glass score running tool
- Model: Techniglass The Runner
- Technology: ART - Adjustable Radius Technology
- Material: aluminum alloy
- Supported glass thickness: up to 1/4" (6 mm)
- Applications: straight scores, inside arcs, circles, angles, deep curves, and intricate shapes
- Handle design: ergonomic, suitable for right and left-handed users
- Special feature: patent-pending self-aligning directional knob technology

Instructions of usage

- Set the directional knob indicator to match the score path, whether vertical, horizontal, or angled
- Place The Runner along the scored line on the glass
- Apply controlled pressure to run the score accurately
- Use it for narrow strips, perfect circles, deep inside curves, and split-ring shapes
