

TECHNIGLASS THE FOILER

The Foiler is an innovative tool developed by Techniglass to simplify and enhance the precision of copper foil application in Tiffany glasswork. The precision tip system ensures perfectly centered foil placement along glass edges, adapting to different shapes, thicknesses, and textures. It integrates a system that cuts the foil and presses it onto the glass, ensuring a smooth, secure and professional bond. **Key features**

- Centered and continuous application via precision tip
- Integrated system for cutting foil and pressing it onto glass
- Compatible exclusively with Techniglass "The Foil" copper tapes
- Color-coded system for instant width identification
- Compact, portable, ergonomic and ambidextrous design
- EZ-View window to monitor foil level
- Convertible into a tabletop system with The Foiler Station (item 63376)

Technical specifications

- Compatibility: Techniglass "The Foil" copper tapes only
- Supported widths: 3/16" (4.8 mm) – blue; 7/32" (5.7 mm) – orange; 1/4" (6.4 mm) – green
- Foil length: 20 m (22 yards)
- Applicator tips: interchangeable, color-coded
- Integrated components: cutting blade, crimper/burnisher pressing system, glass guide, rollers
- Visual control: EZ-View window
- Structure: compact hinged body with internal tape housing
