

PREMIXED WAX PEARLS

Paraffin and stearin mixed in a perfect balance make this wax particularly suitable for making homemade candles (using molds) or container candles.

INSTRUCTIONS

- USE:
- Melt the paraffin in a double boiler (70 - 90°C), add fragrances and aromas if necessary, and mix for 1-2 minutes.
 - The paraffin can now be poured into the mold/container or used to make dipped candles.
 - We recommend adding fragrances by weight in percentages ranging from 5% to a maximum of 12%.

IN COMBINATION WITH:

- Liquicer
- Powder pigments
- Wax Pigment Sticks
- Wax pigment pastilles
- Any wick except round for gel wax
