

BEESWAX VIRGIN

100% pure beeswax, in soft yellow beads.
Suitable for candle making, including dipping.
Can be used cosmetically for the preparation of creams and ointments.

INSTRUCTIONS

USE:

- Melting point 62°C.
- Recommended pouring temperature 80°C.
- We recommend adding 5% stearin to improve the appearance, aroma, and burning duration.
- If used in molds, it is advisable to use silicone release agents.

IN COMBINATION WITH:

- Wick For Natural Wax Candles
- Round Wick

Beeswax is usually not colored because one of its characteristic features is its color.

But if you want to color it, you can do so with Liquicer.

Obviously, the base color of the wax remains predominant, and therefore, especially for brighter colors, the final result may be altered.
