

GABON EBONY WOOD

Ebony (*Diospyros crassiflora*) is an all time favourite of woodworkers, already the Egyptians used it for precious and fine works of art, its brilliant appearance and good qualities. The wood is hard and heavy, has a very straight and fine texture with metallic lustre, it finishes smoothly and takes a high glossy polish. Ebony is generally black but very often typical lighter streaks appear, giving the wood yet more attractivity.

Sample photos, actual pieces may differ, you will get a rough sawn blank!
