

## JAPANESE EDGE BEVELER

This high precision tool has a cutting edge of precisely 0.8mm and is excellent for smoothing the edge of your leather.

Available in 3 sizes:

- 0.8 mm edger for fine leather (1.3mm or less)
- 1.0 mm edger for medium leather (1.3mm - 2.0mm )
- 1.2 mm edger for thick leather (up to 3.0 mm)

Ergonomically curved to maximise comfort and efficiency, this tool can be sharpened and is made from steel, not cast metals, it will last years!

This high quality tool is an excellent addition to your leather workshop.

Please note, this tool is not recommended for very soft leather, especially very soft chrome tanned leather.

Made in Japan.
