

BRASS SHEET HARD

Hard brass sheet, non-annealed, offering higher rigidity and mechanical strength compared to the soft version. Designed for artisans and makers who require dimensional stability, it is suitable for structural jewellery, decorative components, model making and craft applications where shape retention is essential. As a semi-finished product, the surface may show minor marks or scratches to be removed during processing; larger sheet sizes are generally supplied rolled. Available in multiple thicknesses and sizes. **Key features**

- Hard, non-annealed brass
- Warm golden appearance
- Suitable for structural jewellery and technical applications
- Available in various thicknesses and formats

Technical specifications

- Material: brass
- Condition: hard
- Supply form: flat sheet

SPECIFICHE
