

COPPER SHEET SOFT

Soft copper sheet, annealed to enhance ductility and ease of forming, making it especially suitable for hand processing. Designed for artisans and makers, it is ideal for jewellery, model making and decorative applications, including creative techniques such as enamelling, chasing and forming. As a semi-finished product, the surface may show minor marks or scratches to be removed during processing; larger sheet sizes are generally supplied rolled. Available in multiple thicknesses and sizes. **Key features**

- Soft, annealed copper with high ductility
- Suitable for jewellery, enamelling and decorative work
- Easy to bend, shape, chase and work by hand
- Available in various thicknesses and formats

Technical specifications

- Material: copper
- Condition: soft
- Supply form: flat sheet
