

## DIALUX POLISHING COMPOUND

Dialux is a series of premium polishing compound specially formulated for jewellers and watchmakers. The compound is blended with abrasive, so you'll need just a small amount on the wheel or felt tool: you will love the results.

Dialux is available in the following colors:

- **Dialux Blue:** A general purpose polishing compound for all metals including steel, stainless steel, silver and non precious metals such as copper and brass. Removal of scratches, cleaning and high lustre finish. Use with soft white mops.
- **Dialux White:** For reflective polishing of silver and silver alloys, white gold and plastics. Pre-polish and polish to a high reflective lustre. Use with soft white mops or cloths.
- **Dialux Red:** Polishing or brightening for yellow gold or silver. Use with soft cloth mops.
- **Dialux Grey:** Cuts well, removes deeper scratches and refreshes stainless steel. Use with a cloth or close stitched cotton cloth mops.
- **Dialux Green:** For bright polishing of hard alloys such as platinum, white gold, chrome and stainless steel. Also suitable for silver. Use with soft cloth mops.
- **Dialux Yellow:** Cutting compound for softer materials: non ferrous metals, plastics, resins and laquer. Removal of scratches and pre-polish (also works well with gold and silver). Use with harder stitched cotton cloth mops.
