

TITANIUM SHEET SOFT

This Grade-1, commercially pure titanium sheet and is specially etched for anodizing applications but is ideal for a wide range of fabrication uses. The sheet is ductile and can be formed with a bit of effort. This metal is corrosion-resistant and hypoallergenic.

Titanium is a strong, lightweight silver-gray metal with low toxicity (so low that it is safe even for those with extreme sensitivities to metal jewelry) and virtually no susceptibility to tarnish. Our titanium is Grade-1, commercially pure, material.

SPECIFICHE

SKU	Thickness	Size
44848	0,4 mm	150 x 75 mm
44849	0,6 mm	150 x 75 mm
