

MOTTLER WITH SQUIRREL HAIR AND CARDBOARD HANDLE

Very long flat-pointed brush in natural Vaio hair, with shaped cardboard handle.

- The 202 series flat brush on cardboard is used essentially for picking up and placing the gold leaf, thanks to the electrostatic charge typical of this hair.
- The 202 series is characterized by the flat cardboard handle which avoids any type of friction in the applications of the gold leaf, with an excellent fullness of hair and extreme softness.
- The stroke used for cutting creates long and thin lines, when pressed it has the shape of a large and long rectangle.
- Used above all for wide-ranging backgrounds in gilding, the 202 series is held between the fingers, giving greater sensitivity of use to the professional gilder.
- The brushstroke is elastic, soft and keeps its shape for a long time, the selection of sizes is on the average wide and is the most used by restorers and gilders.
- The name of vaio indicates a natural squirrel hair worked with an ancient technique handed down by furriers, characterized by extreme softness and elasticity
- For optimal use, first pass it on velvet.
- The fineness of the fiber and its flexibility, associated with a slow and homogeneous release of water, make it ideal for homogeneous spreading, precision varnishing without traces and large format gilding.
- Single packaged.
