

PNEUMATIC TOOTHED CHISEL WITH WIDIA TEETH 7.5 MM

Toothed chisel for stone carving with 7.5 mm shank for pneumatic hammers, equipped with tungsten carbide teeth. Ideal for refining marble and granite after roughing, it smooths irregularities and produces the characteristic comb-like texture. Made in Italy and available in several widths with 2, 3 or 4 teeth. **Key features**

- 7.5 mm shank for pneumatic hammer use
- Tungsten carbide teeth
- Comb-texture finishing on marble and granite
- Made in Italy
- Available with 2–4 teeth
