

## COBRA 091 - PAINTING MEDIUM

### Cobra Painting Medium

Cobra Painting Medium is a colourless medium that can be mixed with Cobra oil paint to create a smoother and fatter paint. This allows the paint to be spread out easily and the brush stroke to become less distinct. It can be applied in a layered painting technique as well. This painting medium is based on vegetable oils and synthetic resin.

#### Properties:

- Increases the gloss and transparency of the paint.
- Can be thinned with water.
- Makes the brush stroke run slightly.
- Does not influence the drying time of the paint.
- Increases the durability of the paint film.
- Yellows slightly.
