

HI-TECH RED THIN SINTERED DIAMOND SAW

Hi-Tech Diamond Thin Sintered Diamond Saw Blade – Long-Lasting and Precise Cutting The Hi-Tech Diamond thin sintered diamond saw blade is designed for exceptional durability and precise cutting performance. Made with premium diamond grit (325#/400#) secured into a metal bond, this blade utilizes sintered technology, which increases its lifespan compared to notched rim blades. As the blade edge wears, new diamonds are continuously exposed, ensuring clean and accurate cuts over time. With its thin rim, this blade is perfect for cutting and trimming materials such as quartz, topaz, glass, and fine agates. All blades feature a 15.88 mm arbor and come with a 12.7 mm bushing, ensuring maximum versatility. **Key Features:**

- High-quality sintered diamond blade for exceptional durability
- Precise cuts on quartz, topaz, glass, and fine agates
- Available in red or black (no impact on performance)
- 15.88 mm arbor with 12.7 mm bushing included
- Ideal for thin and refined cuts

Important Purchasing Note:

- The measurements indicate the outer diameter x the thickness of the inner part of the blade (core) x the cutting width (kerf) in millimeters.
- 203.2 mm saw blade available in either red or black, without affecting performance.

INSTRUCTIONS

Usage Instructions:

These diamond saw blades must be used with a lubricant such as water or oil. NEVER run the blade dry! We recommend using high-quality cutting oil to enhance performance and extend the blade's life. After use, spin-dry the blade to prevent rusting.

SPECIFICHE

SKU	Size
59250	Ø 100 x 0,4 x 0,6 mm
59251	Ø 125 x 0,3 x 0,4 mm
59252	Ø 150 x 0,4 x 0,6 mm
59253	Ø 200 x 0,6 x 0,8 mm
59254	Ø 200 x 0,8 x 1,0 mm
