

## WHITE GRAPHITE PAPER

**White Graphite Transfer Paper** is an essential tool for artists working on large-scale projects or complex surfaces. Its surface is coated with a thin layer of graphite, which, when activated by the pressure of a pencil or similar tool, allows precise and clean transfer of designs onto the target surface. The white color is especially effective for dark backgrounds, wood, and metal, making lines clear and well-defined. Marks can easily be erased with a white eraser, ensuring a clean and accurate artistic result.

Main Features:

- **Precise and reliable transfer:** Perfect for transferring designs onto complex surfaces.
- **White color:** Ideal for dark surfaces, such as wood and metal.
- **Erasable:** Marks can be easily removed with a white eraser.
- **Versatile use:** Suitable for large-scale projects and various artistic techniques.
