

STAINLESS STEEL FLASK

Stainless Steel 202 Flask for Lost-Wax Casting The Stainless Steel 202 Flask is designed for lost-wax casting in jewelry making. With high resistance and durability, it ensures excellent performance even at high temperatures. It must be used with a **rubber sprue base**, available in diameters of 50, 75, and 100 mm. **Key Features:**

- Made from high-quality 202 stainless steel.
- Sturdy 2.0 mm (GAUGE 14) thickness for durability.
- Ideal for lost-wax casting in jewelry making.
- Resistant to corrosion and high temperatures without deformation.
- Compatible with rubber sprue bases in 50, 75, and 100 mm diameters.
