

SINTOLIT METAL PUTTY

Sintolit Metal is a two-component epoxy filler that bonds, fills and rebuilds missing parts of iron and other metals in minutes – ideal for exhausts, radiators, fuel tanks, body panels and for restoring stripped threads, providing high adhesion and a tough, paintable finish. **Key features**

- Two-part epoxy system
- Extra-strong metal-to-metal bonding
- Restores damaged threads
- Easy 1-3 % hardener mix
- Fast curing

Technical specifications

- Type: epoxy filler
- Mix ratio: 1–3 % hardener
- Substrates: iron, steel, most metals
- Application: metal spatula
- Sandable and paintable

1. Clean and degrease the surface thoroughly
2. Sand painted areas
3. Mix filler with 1–3 % hardener
4. Apply with a metal spatula to desired level
