

POLYESTER PUTTY FOR LIGHT/DARK WOOD 125 ML

Ready-to-use polyester wood filler with unsaturated resins and mineral fillers for knife application: it fills holes and cracks and rebuilds missing sections on any timber, indoors or outdoors. The high-adhesion formula sands easily, can be machined with power tools and, once cured, accepts all paints for durable, weather-resistant repairs. **Key features**

- Clean spatula application
- Fills and rebuilds defects
- Interior & exterior rating
- Sandable and paintable
- Workable like real wood

Technical specifications

- Composition: unsaturated polyester resins + mineral fillers
- Mix ratio: 1-3 % hardener
- High bond on all woods
- Storage: 12 months at 18-25 °C

1. Clean and dry the surface
2. Blend in 1-3 % hardener
3. Apply with spatula and allow to cure
