

SCHAUER ENAMEL - SPARKLING TRANSPARENT

Schauer Sparkling Enamel is a colorless fine-grain enamel for metal enameling, enriched with gold-yellow metallic inclusions that create shimmering highlights. Supplied as a powder, it is mixed with opaque enamels to achieve luminous metallic effects.

Key features

- Fine-grain enamel with gold-metal inclusions
- Colorless, ideal additive for opaque enamels
- Creates shimmering golden reflections
- Suitable for metal enameling techniques

Technical specifications

- Supplied as powder
- Composition: fine enamel with metallic particles
- Use on copper, silver or other enamelable metals
- Color tone may vary depending on firing and base enamel

Instructions of usage

- Mix in variable ratio with opaque enamel
- Apply on clean, dry metal surface
- Fire according to the base enamel curve
- Note: shades may differ from images shown
