

## WICK LK FOR BEESWAX

This round wick is specially treated for beeswax candles, made without chemicals, metal core, lead or nylon. Unbleached and chlorine-free, it provides a clean, steady burn. Designed to withstand the higher melting point of beeswax, it ensures a bright flame, reduced soot and improved efficiency, helping your candles burn longer and safer. **Key features**

- Chemical-free and metal-core-free
- Suitable for high beeswax temperatures
- Clean, even and efficient burn
- Minimizes soot formation
- Enhances candle burn time

### Technical specifications

- Material: natural wick, lead-free, nylon-free
- Treatment: unbleached, chlorine-free
- Use: designed for beeswax candles
- Recommended candle diameter: 30–40 mm
- Performance: high thermal resistance

SKU F008016
