

DRILLED ROUND SEMI-PRECIOUS NATURAL STONES

Round natural semi-precious gemstones with a 5 mm diameter and partial through-hole (0.8–1 mm), designed for delicate jewelry making and decorative details. Ideal for necklaces, bracelets, earrings, rosaries, pendants and stringing or cold-setting techniques, they can also be used as accent elements in handcrafted jewelry. The available colors suit different styles: Rose Quartz for romantic designs, Lavender for soft contemporary tones, Amethyst for elegant hues, Garnet for deep accents, Hematite for metallic contrasts and Citrine for bright highlights. As natural gemstones, they cannot be fired at high temperatures or used with Art Clay or Metal Clay in a kiln. **Key features**

- Natural semi-precious gemstones, each piece is unique
- Round shape with partial hole for stringing and setting
- Wide color range for creative combinations
- Suitable for handcrafted jewelry and accessories
