

PLASTER AND MODELLING SPATULA TOOLS MILANI

Milani hand-forged carbon steel plaster and modelling tools are crafted in Italy using traditional artisanal methods. Designed for sculpting, modelling and finishing work, they provide strength, balance and precise control. Due to the handmade process, dimensions may vary slightly. Available in a wide range of shapes and thicknesses to suit different techniques and working styles.

Key features

- Hand-forged carbon steel construction
- High-quality Italian artisanal production
- Multiple shapes and thickness options
- Excellent durability and precision
- Suitable for plaster and modelling materials

Technical specifications

- Material: carbon steel
- Manufacturing process: hand-forged
- Origin: Made in Italy
- Dimensions: slight variations due to handmade nature
