

WOODEN CALIPER FOR POTTERY AND SCULPTURE

Wooden calipers designed to keep sizing accurate across wheel-thrown and sculpted ceramic projects. Made from durable, lightweight, non-toxic wood, they are suitable for studio, classroom, or home use. Adjustable thumbscrews allow precise measurement of pottery openings and sculpture dimensions, ensuring consistency between pieces, proper lid fitting, and correct proportions. Available in 2 sizes. **Key features**

Key features

- Ensures consistent sizing in ceramic projects
- Durable, lightweight, non-toxic wood construction
- Adjustable thumbscrews for precise measurements
- Ideal for pottery, sculpture, and education
- Helps maintain accurate proportions and fits
