

BLACK ANNEALED WIRE IN COIL

Black annealed construction wire supplied in a hank combines exceptional pliability and tensile strength for tying, binding and craft projects; its softened temper makes bending and twisting effortless while retaining firm hold. The dark finish reduces glare and blends with structures; may show traces of rust—still reliable for heavy-duty and artistic uses when cleaned before application. **Key features**

- Flexible annealed wire for easy bending and secure ties
- High tensile strength ensures reliable holding power
- Dark finish for low visibility and reduced glare
- Supplied in a hank for convenient storage and handling

Technical specifications

- Material: annealed steel
- Finish: black/oxidized
- Presentation: hank (coil)
- Condition: may show traces of rust – inspect and clean before use
