

## HIGH DENSITY FELT FOR EMBOSSING

High-density felt designed to provide stable and uniform support during stippling, repoussé and embossing work on metal. Its compact structure absorbs tool pressure, allowing controlled deformation of the material and improving detail accuracy and relief quality. Ideal for copper sheets and other thin metals. **Key features**

- High density for stable support
- Excellent pressure absorption
- Ideal for stippling, repoussé and embossing
- Suitable for copper and thin metals
- Available in two sizes

### Technical specifications

- Thickness: 2 mm
- Material: high-density felt
- Available sizes: 2
- Application: support for metal relief work

SKU F008099

### SPECIFICHE

SKU	Thickness	Size
24548	2 mm	15 x 20 cm
24549	2 mm	20 x 30 cm
